

MATHEMATICS MAGAZINE

ARTICLES BY TITLES

INDEX TO VOLUME 37

JANUARY THROUGH DECEMBER, 1964

A combinatorial problem associated with a family of combination locks, <i>G. Simmons</i>	127
A complete set of coefficient functions for the second degree equation in two variables, <i>J. M. Stark</i>	253
A difference method for obtaining Z-Transforms, <i>D. C. Fielder</i>	346
A division algorithm, <i>Herta Taussig Freitag and A. H. Freitag</i>	153
A Fibonacci-like sequence of composite numbers, <i>R. L. Graham</i>	322
A formula concerning twin primes, <i>Georgetta J. Kostis and R. L. Page</i>	193
A four circle inequality, <i>J. M. Sloss</i>	327
A geometrical approach to probability, <i>H. D. Brunk and L. G. Gref</i>	287
A geometrical coincidence, <i>Leon Bankoff</i>	324
A hyperbolic proposal, <i>W. R. Ransom</i>	221
A method of establishing certain irrationalities, <i>E. A. Maier and Ivan Niven</i>	208
A note on coefficients of cyclotomic polynomials, <i>Helen Habermehl, Sharon Richardson and Mary Ann Szwajkos</i>	183
A note on convex polygons inscribed in open sets, <i>Andrew Bruckner</i>	250
A note on finite Boolean rings, <i>R. E. Smithson</i>	325
A note on representations of abstract groups as groups of motions, <i>R. A. Melter</i>	330
A note on Stirling numbers of the first kind, <i>L. Carlitz</i>	318
A note on the equation $n^2+n+1=p^r$, <i>J. P. Burling and V. H. Keiser</i>	339
A note on the fair division problem, <i>A. M. Fink</i>	341
A note on the operator D , <i>J. G. Christiano and R. J. Cormier</i>	343
A projection of norm one may not exist, <i>D. B. Goodner</i>	334
A proof of the sufficiency condition for exact differential equations of the first order, <i>M. J. Hellman</i>	273
A remark concerning the definition of a field, <i>A. H. Lightstone</i>	12
A simple matrix inversion procedure?, <i>William Squire</i>	214
A theorem in applied linear algebra, <i>B. Cvetkov</i>	148
A triple product of vectors in four-space, <i>M. Z. Williams and F. M. Stein</i>	230
An application of continuants, <i>S. L. Basin</i>	83
An elementary derivation of the Cauchy, Hölder, and Minkowski inequalities from Young's inequality, <i>Elmer Tolsted</i>	2
An extension of "An approximation for any positive integral root," <i>E. M. Romer</i>	187
An integral property of cubics and quadratics, <i>W. R. Talbot</i>	325
Ancient algorithms adapted to modern computers, <i>L. D. Kovach</i>	159
Ante Upmanship, <i>Marlow Sholander</i>	18
Bayes' formula and a priori probabilities in the game of bridge, <i>N. Divinsky</i>	235
Boolean matrices and logic, <i>F. D. Parker</i>	33
Boundedness of the sequence $(1+1/n)^n$, <i>B. K. Youse</i>	50
Bracket function congruences for binomial coefficients, <i>L. Carlitz and H. W. Gould</i>	91
Cartoon, <i>R. C. Buck</i>	301
Circle associate of a given point, <i>D. M. Bailey</i>	224
Classroom note on e^a , <i>J. Pritchett</i>	82
Coin tossing, probability, and the Weierstrass approximation theorem, <i>R. G. Kuller</i>	262
Combinatorial homotopy theory and a new proof that the second homotopy group of the circle is trivial, <i>Harry Gonshor</i>	298
Comment on "A magic pentagram," <i>D. I. A. Cohen</i>	49
Comment on the paper "Some probability distributions and their associated structures," <i>L. Carlitz</i>	51
Consecutive integers whose sum of squares is a perfect square, <i>Brother U. Alfred</i>	19

Correction to "Factorization of integers," <i>W. E. Christilles</i>	32
Distance between two points on a sphere, <i>Curt Marcus</i>	54
Editorial, <i>Roy Dubisch</i>	1
Editorial comments, <i>Roy Dubisch</i>	207
Existence theorems, <i>T. P. Haggerty</i>	50
Factorization of linear second order differential operators, <i>J. H. Heinbockel</i>	302
Four equal tritangent circles, <i>Leon Bankoff</i>	48
Graphs of semi-complex functions, <i>Paul Schaefer</i>	271
How much redundancy?, <i>F. M. Stein</i>	344
How to solve cyclic differential equations, <i>Edgar Karst</i>	305
Imaginative mathematics, <i>N. A. Court</i>	14
Information theory, <i>Hartley Rogers, Jr.</i>	63
Inner products of multilinear vectors, <i>H. R. Pyle</i>	93
Invariants associated with a family of curves, <i>F. S. Nowlan and A. A. Aucoin</i>	132
Loans with a partial payment, <i>H. E. Stelson</i>	178
Matrices in teaching trigonometry, <i>A. R. Amir-Moéz</i>	78
Note on consecutive integers whose sum of squares is a perfect square, <i>Stanton Philipp</i>	218
Note on modules, <i>R. E. Peinado</i>	266
Note on squares and cubes, <i>J. Allard</i>	210
On extrema in n -variables, <i>T. E. Mott</i>	167
On Fibonacci sequences and a geometrical paradox, <i>Santosh Kumar</i>	221
On Norrie's identity, <i>K. S. Williams</i>	322
On round pegs in square holes and square pegs in round holes, <i>David Singmaster</i>	335
On some contradictions in boundary value problems, <i>W. P. Reid</i>	172
On the n th derivative of a determinant of the j th order, <i>J. G. Christiano and J. E. Hall</i>	215
On the rational congruence of ternary quadratic forms, <i>Amin Muwafi</i>	185
Open problems of interest in applied mathematics, <i>Henry Winthrop</i>	112
Periods of polynomials modulo p , <i>D. E. Daykin</i>	274
Point of intersection of triangle transversals, <i>D. M. Bailey</i>	331
Random walk with transition probabilities that depend on direction of motion, <i>Leon Cohen</i> ..	248
Reflections on pure geometry, <i>N. A. Court</i>	337
Representing numbers using only one 4, <i>D. E. Knuth</i>	308
Riemann integrals as mappings in elementary applications, <i>L. E. Pursell</i>	311
Sequences of the k th powers with k th power partial sums, <i>D. A. Klarner</i>	165
Simultaneous solution of the three ancient problems, <i>Joyce Currie Little and V. C. Harris</i> ..	310
Some nonlinear differential equations satisfied by the Jacobian elliptic functions, <i>A. C. Soudack</i>	138
Subadditivity is a rotation invariant, <i>R. G. Laatsch</i>	195
Sufficient conditions for envelopes in n -space, <i>A. B. Brown</i>	227
Tangent outside the curve, <i>W. R. Ransom</i>	340
The distance of a point from a line, <i>T. A. Brown</i>	157
The exponential representation of unitary matrices, <i>R. F. Rinehart</i>	111
The functional operator $Tf(x) = f(x+a)f(x+b) - f(x)f(x+a+b)$, <i>H. W. Gould</i>	38
The Kuratowski closure axioms, <i>Shair Ahmad</i>	296
The maximum of $\sum_{i,j=1}^n a_{ij}b_{ij}$, <i>Ronald Wagstaff and L. R. Tanner</i>	46
The occurrence of digits, <i>F. J. Wagner</i>	177
The way of redemption, <i>M. D. Tepper</i>	269
Triangulation of a triangle, <i>A. Bloch</i>	242
Twisted determinants that sum to zero, <i>J. E. Cohen</i>	267
Two parametric representations of a circle in 3-dimensional euclidean space, <i>Leo Unger</i>	100

PROBLEMS AND SOLUTIONS

EDITED BY ROBERT E. HORTON, Los Angeles City College

PROPOSALS

Bankoff, Leon, 353	Kravitz, Sidney, 197
Beineke, L. W., 276	Labelle, Gilbert, 276
Brooke, Maxey, 352	Love, J. B., 55
Brother U. Alfred, 55, 119	Makowski, Andrzej, 55
Carlitz, Leonard, 55, 352	Moon, J. W., 276
Cohen, D. I. A., 119, 197	Moser, Leo, 55, 119
Cohen, M. J. 352	Ogilvy, C. S., 119
Dakkah, Yasser, 196	Rao, D. R., 119
Dapkus, Frank, 353	Sharpe, B. B., 276
Demir, Huseyin, 55, 119, 276	Silverman, D. L., 276
Feinman, Roy, 197	Spiegel, M. R., 277
Freitag, Herta Taussig, 353	Tan, Kaidy, 197
Hachman, Morton, 276	Trigg, C. W., 196, 353
Klamkin, M. S., 55, 119	Verdina, Joseph, 197

SOLUTIONS

Andersson, Josef, 354, 358	Kesarwani, R. N., 203
Bailey, D. M., 204	Klamkin, M. S., 203
Blundon, W. J., 121	Konhauser, J. D. E., 357
Bowen, B. B., 200	Kugelmass, Joel, 57, 59
Breault, D. A., 57, 60	Litvach, Barry, 123
Brother Louis F. Zirkel, 57	McDowell, R. S., 120
Brother U. Alfred, 203	Moser, Leo, 57, 280
Brown, J. L., Jr., 357	Nolan, P. R., 57, 124
Cohen, M. J., 281	Parker, F. D., 57
Coffman, R. T., 355	Philipp, Stanton, 280
Dernham, Monte, 199, 359	Ringenberg, L. A., 122
Gold, B. K., 59	Sister Mary Joy, 354
Goldberg, Michael, 277	Sutcliffe, Alan, 121, 198
Gould, H. W., 61, 357	Talbot, W. R., 201
Hamrick, T. R., 56	Trigg, C. W., 360
Hausmann, B. A., 123	Tyrrell, J. A., 279
Hickey, H. W., 120	V. F. I., 123
Hunter, J. A. H., 201, 356	Vaidya, A. M., 278, 357
Jean, J. E., Jr., 280	Van Tassel, Lowell, 120

Quickies and Answers

The page on which Quickies, Trickies and Falsies appear is in the parentheses following the number of these problems; the page on which the Answers, Solutions, and Explanations appear is in boldface.

327, 328, 329, 330 (62) (53); 331, 332, 333, 334, 335 (126) (83); 336, 337, 338, 339 (206) (176); 340, 341, 342, 343 (286) (252); 344, 345, 346, 347, 348 (360) (321).

Trickies and Solutions

58, 59, 60 (126) (82).

Falsies and Explanations

20, 21 (62) (53).

Comments on Falsies: J. F. Ramaley, 360; William Squire, 286.

Comments on Problems: Josef Andersson, 205; Alan Sutcliffe, 277.

Comments on Quickies: J. A. H. Hunter, 284, M. S. Klamkin, 282, 283; Larry Murrell, 205; Alan Sutcliffe, 282, Charles Ziegenfus, 284.

Comments on Trickies: Josef Andersson, 125.

BOOK REVIEWS

EDITED BY DMITRI THORO, San Jose State College

Names of authors are in ordinary type, those of reviewers in capitals and small capitals

Brooke, Maxey. *150 Puzzles in Crypt-Arithmetic*, J. A. H. HUNTER, 348.

National Council of Teachers of Mathematics, *Enrichment Mathematics for High Schools*, C. D. OLDS, 350.
